

# Unit 4 Assessment For Learning

## Design Specifications and Planning Template

Name(s):

---

## Design Specifications

Develop a list of at least six (6) design specifications for the solution. Be sure to think about your client and the purpose of your app. Provide detailed justifications for why each criterion is an important consideration in designing the tool for your client. Describe how you intend to measure the success of each specification and the metric you will use as an indicator of success.

	Design Specification	Method and Metric
1		
2		
3

5		
6		

# Planning Diagrams

Use [Wireframe.cc](https://wireframe.cc) to design the wireframe of your webpage. Make sure to include the following:

1. the main 3 or 4 sections of your webpage
2. the layout of your webpage
3. the placement of the images/graphics to be used
4. the placement of the text that will appear on the page (final product cannot include Lorem Ipsum)
5. annotations that label the different classes and ids you will be using for each element of your webpage

A large, empty rectangular box with a thin black border, intended for the user to create a wireframe diagram of their webpage. It occupies the lower two-thirds of the page.

# Colour Scheme

Select a color scheme from <http://design-seeds.com/> , <http://www.colourco.de/> , <https://coolours.co/> or one of your own and justify your choice based on the meaning of a particular color and your design specifications/success criteria

# Contrast, Alignment, Repetition, and Proximity

Copy and paste your chosen layout from the planning phase. Clearly indicate where/how you have incorporated Contrast, Alignment, Repetition, Proximity Design Principles in your chosen layout. Refer to CARP document.

<b>Contrast</b>	
<b>Alignment</b>	
<b>Repetition</b>	
<b>Proximity</b>
